

Network Packet Source Forensics Device

Features :

- Classifying and analyzing Internet packets and providing reports of application session of respective network communication.
- The analyzed report includes the information of port, start time, end time, source of IP and MAC, destination of IP and MAC, protocol type (UTP/TCP/ICMP), quantity, and data length.
- Predefined the relationship between IP and domain, and import this info into the system in order to find out the domain by IP or find out the IPs by domain.
- Obtaining the IP' s registered info automatically via WHOIS.
- Network Packet Source Forensics Device is able to be integrated with E-DETECTIVE System in order to classify and to analyze Internet packets.

Operating Manual :

1. Providing the information of port, source of IP and MAC, destination of IP and MAC, protocol type (UTP/TCP/ICMP), quantity, Data length.

Start Time	End Time	Source Mac	Destination Mac	Source IP	Destination IP	Source Port	Destination Port	Type	Quantity
